

JetScan[®] MPS

Multi-Pocket Sorters with Fitness Detection

Benefits of using fitness sorting:

- Increase customer satisfaction with notes in good condition, make tellers' job easier
- Maximize uptime, minimize service calls – fill ATMs and other cash dispensers with higher-quality notes
- Reduce transportation costs by recirculating your fit notes
- Avoid cross-shipping fees by following Federal Reserve Bank (FRB) Currency Recirculation Policy fitness guidelines

JetScan MPS4200

JetScan MPS4100

Detects and sorts notes by user-defined fitness settings

JetScan MPS features

Maximize efficiency, maintain flexibility and control:

- Simple operation via intuitive, icon-driven touch screens
- Choose from eight customizable, user-defined fitness levels
- Adjust individual fitness settings independently by denomination
- Quickly and easily change fitness-sorting criteria

Separate fit and unfit notes during high-speed, single pass processing

- Achieve highest throughput speed and volume at 1,000-notes-per-minute
- Sort fit and unfit notes into user assigned sort locations
- In-line facing of notes and automatic strapping for greater efficiency
- Trust in the most effective counterfeit detection available

JetScan MPS 4100 and 4200 models with fitness sorting capability¹ detect soil, holes, tears, folded or missing corners, tape and limpness while counting and authenticating mixed currency.

Multiple sorting pockets, add-on cassette and strapping module options available.

What is a fit versus an unfit note?

A note whose physical condition no longer meets Federal Reserve Bank (FRB) guidelines for fit currency may be deemed unfit and removed from circulation.

“Fit Currency” means a note that is suitable for continued circulation and is sufficiently clean to allow its genuineness and denomination to be readily ascertained.

“Unfit Currency” means a note that is not suitable for further circulation because of its physical condition, such as torn, dirty, limp, worn or defaced.²
